

# Data

We supply technology recruitment services to businesses looking for both contract and perm data and technical professionals. We are a multi-award winning business and one of the fastest growing agencies within the technology sector specialising in data, digital, cloud and security.

## Our areas of specialism

- Big Data
- Data Science
- Advanced Analytics
- Digital Analytics
- Business Intelligence & Data Warehousing
- Research & Insight

## Benefits of using us

### We actively invest in the tech community

All our consultants are measured on the engagement they have with tech professionals, the community they operate in and the relationships they build with skilled professionals. The speed in which we can deliver a short list of relevant candidates that meet your unique needs is testament to our successful community investment.

### We champion gender and minority group talent within the tech sector

We are committed to changing the gender and diversity imbalance within the technology sector. Through our proactive engagement with the tech community including the **Next Tech Girls** initiative and hosting specific gender and diversity events, we are attracting skilled professionals from minority groups which in turn can help you meet your own diversity commitments.

### We work in partnership with you

Collaboration is a cornerstone of our business which allows us to provide a **seamless integration of services** to you across our specialist areas. We want to ensure that our relationship with you lasts beyond a one-off placement and will invest our resources into providing you with an ongoing service to meet your current and future needs.

Projects, change & transformation • Strategy & architecture  
Development & testing • Cyber security • Data

# Data
